Open to Global Remote Opportunities & Relocation

PROFESSIONAL SUMMARY

Certified Data Scientist with 5+ years of experience applying Python, SQL, R, machine learning, and statistical analysis to solve business problems and support evidence-based decision-making. Led analytics initiatives that improved executive decision-making turnaround by 25%, developed predictive models, automated reporting workflows, and delivered 70+ executive reports and dashboards for senior leadership.

Experienced in feature engineering, exploratory data analysis, model evaluation, and cross-functional collaboration within a digital health startup. Passionate about leveraging AI, analytics, and data science to improve public health, nutrition, and humanitarian outcomes

SKILLS

Programming: Python • R • SQL

Machine Learning: Classification • Regression • XGBoost • Feature Engineering • Model Evaluation • Cross-validation • Time Series Forecasting

Statistics: EDA • Statistical Modelling • Hypothesis Testing • Probability • Segmentation

Artificial Intelligence: Azure AI Fundamentals • Deep Learning (TensorFlow/Keras) • NLP Fundamentals • Transformer Fundamentals

Visualization: Power BI • Tableau • Plotly • Dash

Tools & Platforms: Excel • GitHub • Jira • ClickUp • Microsoft Power Automate

PROFESSIONAL EXPERIENCE

Data Scientist (Product & Business Operations)

Thrivhe Wellness Co. – HealthTech Startup | Remote | 2022–2026

- Led analytics initiatives that improved executive decision-making turnaround by 25%, delivering 70+ analytical reports, dashboards, and KPI frameworks that supported strategic planning and business performance monitoring.
- Collaborated with product, engineering, and operations teams to translate business challenges into analytical solutions, influencing 20+ product enhancements across three digital health platforms.
- Automated reporting workflows using Python, SQL, Excel, and Microsoft Power Automate, improving reporting consistency and reducing manual effort.
- Designed analytical workflows and maintained reporting pipelines to improve data quality, reporting accuracy, and evidence-based decision-making.
- Cleaned, transformed, and analyzed structured and unstructured datasets, performing exploratory, statistical, and trend analyses to generate actionable business insights.
- Communicated technical findings and analytical recommendations to executive and cross-functional stakeholders through dashboards, reports, and presentations.

Research Data Analyst

Seedbuilders – Tech Innovation Hub | Abuja, Nigeria | 2021 – 2022

- Conducted exploratory and statistical analyses to evaluate programme effectiveness, participant engagement, and customer experience, translating business questions into measurable analytical outcomes.
- Improved reporting accuracy by 30% through data cleaning, validation, and standardization while developing Tableau and Excel dashboards to monitor organizational KPIs.
- Produced analytical reports and data-driven recommendations that supported strategic planning and evidence-based decision-making.

- Supported recruitment and onboarding activities through interview coordination, candidate assessment, and administrative reporting.

Data Science Intern

Datalab Analytics – Data Analytics Training & Consulting | Abuja, Nigeria | 2021

- Completed a three-month intensive, project-based data science internship applying Python, R, SQL, SPSS, machine learning, and statistical analysis to solve real-world business problems.
- Built end-to-end analytics and machine learning projects, including Telco Customer Churn Prediction and Cryptocurrency Closing Price Prediction, performing data cleaning, exploratory analysis, feature engineering, model development, and performance evaluation.
- Successfully completed practical assignments, technical assessments, and a final project evaluation, earning a professional certification in Data Science.

Graduate Research Intern

Dataville Research LLC – Research & Consulting Firm | Remote | 2019–2020

- Conducted quantitative research and data analysis on Sustainable Development Goal (SDG) indicators.
- Supported evidence-based reporting and proposal development through structured data analysis and research documentation.

SELECTED DATA SCIENCE PROJECTS

- [Financial Fraud Detection System \(Python\)](#)
Built a fraud detection pipeline using imbalance-aware machine learning techniques, achieving a ROC-AUC of 0.966 and F1-score of 0.799 through robust model development and evaluation.
- [Walmart Store Sales Forecasting \(Python\)](#)
Developed an end-to-end time-series forecasting pipeline using historical sales, economic indicators, store metadata, and holiday effects to support inventory planning and demand forecasting.
- [Heart Disease Risk Prediction \(R\)](#)
Developed interpretable machine learning models for cardiovascular risk prediction using feature engineering, class balancing, and cross-validation to support evidence-based healthcare decision-making.
- [Telco Customer Churn Prediction \(R\)](#)
Developed predictive machine learning models to identify customers at risk of churn, achieving a Test AUC of 0.847 and supporting targeted customer retention strategies.

EDUCATION

Bachelor of Science (B.Sc.) – Botany

University of Ibadan | 2018

PROFESSIONAL DEVELOPMENT

Data Science Fellow, Women Techsters Fellowship (Tech4Dev) | 2022–2023

- Selected for a competitive six-month data science fellowship focused on Python, SQL, statistics, machine learning, and data visualization.
- Completed structured technical training, practical assignments, and a team-based capstone project using real-world datasets.

CERTIFICATIONS

IBM Data Science Professional Certificate (Coursera) | **2026**

Microsoft Azure AI Fundamentals (AI-900) (Microsoft) | **2026**

Deep Learning with TensorFlow & Keras (Coursera) | *In Progress*
